Kitamura discloses a cleaner comprising an enclosure (10) disposed at least partially around a cleaning article (20) for effecting cleaning process, wherein the enclosure is deformable (see abstract, solution, lines 3-11); a cleaning solution comprising a surfactant (Translation, paragraph 0021) and compatible with food preparation is in fluid communication with the interior of the microwave oven after the enclosure is deformed (Translation, paragraph 0017).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6, 13, 16, 19, 42, and 48-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitamura (JP 2000082580A) in view of Ueki (JP10314092A).

Kitamura discloses substantially all features of the claimed invention except the at least one component is a surfactant with a concentration in a range from about 0.5% to about 50%. Ueki discloses at least one component is a surfactant with a concentration in a range from about 0.5% to about 50% (Translation, paragraph 0015). It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize in Kitamura at least one component is a surfactant with a concentration in a range from about 0.5% to about 50% as taught by Ueki in order to provide the heighten a cleaning effect. With regard to claim 16, the second time period is about 5 minutes. Kitamura and Ueki do not disclose the second time period is about 5 minutes. It would have been obvious to one having ordinary skill in the art to determine the period and the second period are each about 5 minutes. Since determining how long the period and the second is depending on each of cleaning process, which is suitable to the users.
